What is Group B Strep? Group B Streptococcus (GBS) is a type of bacteria that can cause illness in people of all ages. In newborns, GBS is a major cause of meningitis (infection of the lining of the brain and spinal cord), pneumonia (infection of the lungs), and sepsis (infection of the blood) (CDC 1996; CDC 2005; CDC 2009).

Evidence on Group B Strep in Pregnancy

Universally Preferable Behaviour: A Rational Proof of Secular Ethics by Stefan Molyneux of Freedom Radio attempts to answer the question: how can moral values really exist, and what are they?. Molyneux knows that "the odds that some guy out there on the Internet... has somehow solved the philosophical problem of the ages are not particularly high."

Universally Preferable Behaviour by Stefan Molyneux (Review)

Molecular cloning is a set of experimental methods in molecular biology that are used to assemble recombinant DNA molecules and to direct their replication within host organisms. The use of the word cloning refers to the fact that the method involves the replication of one molecule to produce a population of cells with identical DNA molecules. Molecular cloning generally uses DNA sequences ...

It seems to have everything we are looking for in sustainable, yet portable power that can be generated from the sun. While it does seem a bit expensive on the surface, when you consider that it checks off all three items to begin using solar power and then you offset the potential savings over a years worth of use - the price seems more than justified.
