Biodiversity is not evenly distributed, rather it varies greatly across the globe as well as within regions. Among other factors, the diversity of all living things depends on temperature, precipitation, altitude, soils, geography and the presence of other species. The study of the spatial distribution of organisms, species and ecosystems, is the science of biogeography.

Many women approach menopause with the desire to take only “natural” hormones to help alleviate their symptoms. This causes quite a bit of confusion and miscommunication between doctors and their patients. That’s because all hormones can be marketed as “natural” or “plant-based,” and many pharmaceutical companies are capitalizing on women’s quest for “natural” hormone ...

ZeoBind® supports the body's detoxification functions. ZeoBind® is made from a naturally occurring mineral known as clinoptilolite, which is a particular type of crystalline aluminosilicate in a family of compounds known as zeolites. Clinoptilolite is formed when volcanic molten lava comes in contact with seawater. The result is a 3-dimensional honeycomb-like molecular structure with a...

Fungi Definition. Fungi (singular: fungus) are a kingdom of usually multicellular eukaryotic organisms that are heterotrophs (cannot make their own food) and have important roles in nutrient cycling in an ecosystem. Fungi reproduce both sexually and asexually, and they also have symbiotic associations with plants and bacteria. However, they are also responsible for some diseases in plants and ...
