In a pioneering paper, the U.S. cognitive scientist Marvin Minsky attributed the development of the idea of telepresence to science fiction author Robert A. Heinlein: "My first vision of a remote-controlled economy came from Robert A. Heinlein's prophetic 1948 [sic] novel, *Waldo*," wrote Minsky. In his science fiction short story "Waldo" (1942), Heinlein first proposed a primitive telepresence ...

**Telepresence - Wikipedia**

Electrical engineering is a technical discipline concerned with the study, design and application of equipment, devices and systems which use electricity, electronics, and electromagnetism. It emerged as an identified activity in the latter half of the 19th century after commercialization of the electric telegraph, the telephone, and electrical power generation, distribution and use.
