Biochemical Pharmacology Answered Questions

Biochemical pharmacology is a branch of pharmacology research that studies how drugs influence living systems. This is done using live animal test subjects, and animal or human organs and tissue components. It may also involve elements of molecular pharmacology, where the study of protein interaction with drug molecules is used to determine how a drug will act inside a cell.

What Is Biochemical Pharmacology? (with pictures)

Biochemical Pharmacology is an international peer reviewed journal devoted to publishing original research and invited reviews and commentaries on the interaction of chemical compounds with biological systems. Manuscripts describing experiments conducted with chemical mixtures, plant or animal extracts will not be considered for publication unless the chemical structures and precise ...
