Biodiversity is not evenly distributed, rather it varies greatly across the globe as well as within regions. Among other factors, the diversity of all living things depends on temperature, precipitation, altitude, soils, geography and the presence of other species. The study of the spatial distribution of organisms, species and ecosystems, is the science of biogeography.

Many women approach menopause with the desire to take only “natural” hormones to help alleviate their symptoms. This causes quite a bit of confusion and miscommunication between doctors and their patients. That’s because all hormones can be marketed as “natural” or “plant-based,” and many pharmaceutical companies are capitalizing on women’s quest for “natural” hormone ...
