1. Introduction. Remote sensing has proved its value in many fields but the success of any image classification depends on various factors, including the choice of a suitable classification procedure (Lu and Weng, 2007). Supervised classifiers are widely used since they are more robust than model-based approaches (Niemeyer et al., 2014). These classifiers are able to learn the characteristics of ...

Nuclear winter is the severe and prolonged global climatic cooling effect hypothesized to occur after widespread firestorms following a nuclear war. The hypothesis is based on the fact that such fires can inject soot into the stratosphere, where it can block some direct sunlight from reaching the surface of the Earth. It is speculated that the resulting cooling would lead to widespread crop ...
