How do sensory organs send signals to the brain ...

x An effect of the irradiation time on the biological effectiveness was systematically evaluated in proton therapy for various target sizes, depths and prescribed doses per fraction. Spread-out Bragg peak plans were created using a constant relative biological effectiveness of 1.1 and the biological doses were then calculated based on the microdosimetric kinetic model.

1. INTRODUCTION - A transistor is a small electronic device that can cause changes in a large electrical output signal by small changes in a small input signal. That is, a weak input signal can be amplified (made stronger) by a transistor. For example, very weak radio signals in the air can be picked up by a wire antenna and processed by transistor amplifiers until they are strong enough to be ...
