Asset Le Inventory Management

The difference between inventory and asset management is critical when running your business. Inventory management focuses on monitoring parts and products companies have moving in and out of their stores, where asset tracking focuses on keeping track of items or “asset inventory” an organization needs to function properly.

Inventory Asset Management | Differences | Zenventory

Asset tracking and inventory management are terms that are sometimes used interchangeably, but there are critical differences between these functions and the software used to improve each of these applications. Both types of solutions are focused on improving resource optimization and reducing costs ...

The Difference Between Inventory Management and Asset Tracking

A Definition of Inventory Management. Inventory management is a component of supply chain management that involves supervising non-capitalized assets, or inventory, and stock items. Specifically, “inventory management supervises the flow of goods from manufacturers to warehouses and from these facilities to point of sale.” Thus, inventory management hinges on detailed records of products ...
