The components of the circulatory system include the heart, blood, and blood vessels. The pulmonary circulation is also part of this complex system.

6,493 Questions Asked In Circulatory System - Answers

A closed circulatory system is one in which blood circulates only inside blood vessels. For this reason, the blood pressure is higher in animals with closed circulatory systems. The cellularity of the blood is also higher, with many specific blood cells. Closed circulatory systems are a feature of annelids, cephalopod molluscs and vertebrates.

The Circulatory System - Biology Questions

After the exchange, the blood containing fresh oxygen flows into the left upper atrium. Oxygen-rich blood (see the black arrows) flows from the left upper atrium into the left lower ventricle. When the heart contracts, the left lower ventricle will force the blood out to the body through a network of arteries.
