Inositol is a word that collectively refers to molecules with a similar structure, a collection of nine stereoisomers. While the term 'inositol' is used commonly with dietary supplements, it usually refers to a specific stereoisomer called myo-inositol. Inositols are pseudovitamin compounds that are falsely said to belong to the B-complex family, and are found in most foods but in highest ...

Wondering if anyone has experienced low oxygen saturation levels? I went to a pulmonary specialist for a consult on sleep apnea. Took the pulse, blood pressure, etc. and then said "ohhh your oxygen saturation level is 84%. Kind of low." He then set me up for a sleep study. Anyone else experience ...

Arsenic is a chemical element with the symbol As and atomic number 33. Arsenic occurs in many minerals, usually in combination with sulfur and metals, but also as a pure elemental crystal. Arsenic is a metalloid. It has various allotropes, but only the gray form, which has a metallic appearance, is important to industry.. The primary use of arsenic is in alloys of lead (for example, in car ...

Arsenic - Wikipedia

It might be wise to not discount dietary shock from triggering an afib event. Before I managed to find methods to bring my afib under control it seemed as though I would trigger an event by eating a bag of salted peanuts or a huge brine cured pickle or consuming a very large and sweet mango.
