True class membership is unknown for each individual. As categories of a latent variable, these classes can't be directly measured other than through the patterns of responses on the indicator items.. There are two sets of parameters in an LCA. The first is the set of inclusion probabilities that any random person will be in any latent class.

Schenkerian analysis is a method of analyzing tonal music, based on the theories of Heinrich Schenker (1868-1935). The goal is to demonstrate the organic coherence of the work by showing how it relates to an abstract deep structure, the Ursatz. This primal structure is roughly the same for any tonal work, but a Schenkerian analysis shows how, in an individual case, that structure develops ...
