(2001-08-20) General Counterfeit Penny Problem How do you find a single counterfeit coin [either heavier or lighter than a good one] among n coins in only k weighings on a two-pan balance? We may imagine that all the information gathered at any point of the weighing procedure is recorded by putting all the coins in one of four bins labeled E, G, L, or H (if E is not empty, H and L are):

Division is splitting into equal parts or groups. It is the result of "fair sharing". Division has its own special words to remember. Let's take the simple question of 22 divided by 5. The answer is 4, with 2 left over.. Here we see the important words:

Basic Math Definitions - Math Is Fun

In the section we introduce the concept of directional derivatives. With directional derivatives we can now ask how a function is changing if we allow all the independent variables to change rather than holding all but one constant as we had to do with partial derivatives. In addition, we will define the gradient vector to help with some of the notation and work here.
