Film Critique of the Lower Extremity - Part 3

Besides contributing to body shape and form, our bones perform several important body functions. Support. Bones, the "steel girders" and "reinforced concrete" of the body, form the internal framework that supports the body and cradle its soft organs; the bones of the legs act as pillars to support the body trunk when we stand, and the rib cage supports the thoracic wall.

In Judaism, God has been conceived in a variety of ways. Traditionally, Judaism holds that YHWH, the God of Abraham, Isaac, and Jacob and the national god of the Israelites, delivered the Israelites from slavery in Egypt, and gave them the Law of Moses at biblical Mount Sinai as described in the Torah.According to the rationalist stream of Judaism articulated by Maimonides, which later came to ...
