I do not need to edit any XML-file or anything, this is only for reading and parsing. I want to be able to handle the XML-document as a dictionary, like: username = doc["username"];, but I can't find out how to "convert" the document. I've also encountered the problem with duplicate key-names, but that could be easily avoided by appending each value with 1, 2 etc; making it easy to for-loop ...

In physics, spacetime is any mathematical model that fuses the three dimensions of space and the one dimension of time into a single four-dimensional continuum. Spacetime diagrams can be used to visualize relativistic effects such as why different observers perceive where and when events occur differently.. Until the turn of the 20th century, the assumption had been that the three-dimensional ...

Optimus Prime is the awe-inspiring leader of the Autobot forces. Selfless and endlessly courageous, he is the complete opposite of his mortal enemy Megatron.Originally a mere civilian known as Orion Pax or Optronix, he was chosen by the Matrix of Leadership to command, the first in a number of heavy burdens he has been forced to bear. Another is his bringing of the Transformers' conflict to Earth.
