Posted by Andrew Porter* T oday, there is much greater awareness of the threat of Climate Change. Yet species loss, disruption of planetary systems, and widespread environmental degradation are allowed to continue. Over millennia, we have been very good at developing ways to respond to the environment; now the imperative is to develop the sharpness and capacity to respond to ourselves.

Tell students: Sometimes patterns and relationships are studied simply because they are interesting, and sometimes because they help solve practical problems. Number patterns also can be studied in relation to the world in which we live, in order to help us better understand it. For instance, many of the numbers in the Fibonacci sequence can be related to the things that we see around us.
