1. Introduction. Labor-intensive public works programs (PWPs) are common social protection tools in low-income settings (Grosh et al., 2008). These programs require that beneficiaries work in order to receive a cash payment or in-kind transfer (Besley and Coate, 1992). They have been widely promoted as tools to protect poor households in the face of large macroeconomic or agroclimatic shocks ...

Interaction effects occur when the effect of one variable depends on the value of another variable. Interaction effects are common in regression analysis, ANOVA, and designed experiments. In this blog post, I explain interaction effects, how to interpret them in statistical designs, and the problems you will face if you don't include them in your model.
