First normal form (1NF) is a property of a relation in a relational database. A relation is in first normal form if and only if the domain of each attribute contains only atomic (indivisible) values, and the value of each attribute contains only a single value from that domain. The first definition of the term, in a 1971 conference paper by Edgar Codd, defined a relation to be in first normal ...

Say the good ship Polaris has a mass of 181,000 kilograms (181 metric tons). It has super powerful Nuclear Salt Water Rockets with an exhaust velocity of 182,000 meters per second (because it is using 22% enriched uranium) and a remass flow of 71 kilograms per second. If the Polaris is floating in space with a speed of zero, how fast will it be moving if it burns its engine for ten seconds?

In atomic physics, the spin quantum number is a quantum number that parameterizes the intrinsic angular momentum (or spin angular momentum, or simply spin) of a given particle. The spin quantum number is the fourth of a set of quantum numbers (the principal quantum number, the azimuthal quantum number, the magnetic quantum number, and the spin quantum number), which completely describe the ...

A space station is basically a spacecraft with no propulsion. Which boils down to just the habitat module and the payload. Like any other living system, the internal operations of a space station can be analyzed with Living Systems Theory, to discover sources of interesting plot complications. Much like spacecraft, in a science fiction story a space station can become a character all by ...

Because black holes are so massive, but at the same time so compact, matter needs to give up a lot of energy to fall all the way in. As a result, some accretion disks around supermassive black holes are incredibly bright, and can outshine all the billions of stars in their host galaxy put together.

Last month, a YouTube video of a conference talk in Berlin, shared widely among artificial-intelligence researchers, offered a possible answer. In the talk, Naftali Tishby, a computer scientist and neuroscientist from the Hebrew University of Jerusalem, presented evidence in support of a new theory explaining how deep learning works. Tishby argues that deep neural networks learn according to a ...

Ideally, know what is dependent, and what is not. In your scenario, Component depends on TypeComponent. I like to think of it like an atomic object. It can exist by itself. On the other hand, Component cannot exist without TypeComponent, since its TypeID field references the primary key of the TypeComponent table. Hence, when inserting into Component, the database engine checks for the ...

Immanuel Kant. Towards the end of his most influential work, Critique of Pure Reason(1781/1787), Kant argues that all philosophy ultimately aims at answering these three questions: "What can I know? What should I do? What may I hope?" The book appeared at the beginning of the most productive period of his career, and by the end of his life Kant had worked out systematic, revolutionary, and ...
