Mars Atmosphere and Volatile Evolution (MAVEN) mission was developed by NASA to study the Martian atmosphere while orbiting Mars. Mission goals include determining how the planet's atmosphere and water, presumed to have once been substantial, were lost over time.. MAVEN was launched aboard an Atlas V launch vehicle at the beginning of the first launch window on November 18, 2013.

MAVEN - Wikipedia

You've probably heard the term nor'easter in movies and on television, but what exactly does it mean? A nor'easter is a type of storm that forms along the East Coast of North America. Nor'easters are named after the direction from which the strongest winds typically blow over the northeast states, including New England and the Mid-Atlantic states.

What Is a Nor'easter? | NOAA Scijinks - All About Weather

Snow is an accumulation of packed ice crystals, and the condition of the snowpack determines a variety of qualities, such as color, temperature, and water equivalent. As weather conditions change, the snowpack can change as well, and this affects the characteristics of the snow. The colors of snow. Generally, snow and ice present us with a uniformly white appearance.

This is a great article! I'm now learning how to teach adults and the hardest kind: sales people. Sales people in any corporation have a bit of an arrogance of their importance to the company.

Characteristics of Adult Learners - The eLearning Coach

In the mature stage of a thunderstorm, the warmed air continues to rise until it reaches an area of warmer air and can rise no farther. Often this 'cap' is the tropopause. The air is instead forced to spread out, giving the storm a characteristic anvil shape. The resulting cloud is called cumulonimbus incus. The water droplets coalesce into larger and heavier droplets and freeze to become ice ...
