Somewhat related: With a few weeks of practice I managed to develop the skills to make a fire kit and actually make a fire with a hand drill. It was a bastard, and we barely pulled off the fire as part of the show, but again, it illustrates that although many of these skills are quite complex, a relative amateur can attain enough technique to pull this off in fairly demanding situations.

Nothing reinforces instruction better than actual case studies. This is especially true of interventional radiology coding, which comes with some of the most complicated rules in all of medicine. The Interventional Radiology Case Studies contain documentation from actual IR procedures, so you can better understand how to correctly assign both CPT® and ICD-9 codes.

No Single Answer. In all likelihood, no single model will be used to risk-stratify the various patient populations of a provider organization. "We're finding that a single approach doesn't quite do it, because different models work better for different situations, and you might have different sources of data for different populations," Udy says.
