Relationships and Biodiversity Lab Practice Quiz Answers. 1. The reason for the common characteristics shared by the plants in this lab is the fact that the plants had a great deal of DNA which was the same as that of the common ancestor, so this coded for similar enzymes and proteins (and hence structures) in each of these plants.

Living Environment Labs - Putnam Valley Central School ...

Name. Period Date Introduction Botana curus is a valuable plant because it produces Curol, a compound used for treating certain kinds of cancer. Curol cannot be produced in the laboratory. Botana curus grows very slowly and is on the endangered species list, so its ability to provide Curol in large quantities is limited.

Name. Period Date Introduction - Manhasset Union Free ...

What does this lab entail? •Seven tests that look at the physical, chemical, and microscopic characteristics of three plants that may be able to create Curol, even though they are not Botana curus (the plants that does produce it). •Comparison of data to determine relationships. •Define the crucial need for biodiversity.
