Monohybrid Cross Problem Set - The Biology Project

BIOLOGY OF PLANTS. Plants are alive, just like people and animals. How do we know this? Living things all do certain things: They grow and die. They need energy, nutrients, air, and water. They produce young.

Biology of Plants: Introduction - MBGnet

Why a Scientific Format? The scientific format may seem confusing for the beginning science writer due to its rigid structure which is so different from writing in the humanities. One reason for using this format is that it is a means of efficiently communicating scientific findings to the broad community of scientists in a uniform manner.

How to Write Guide: Sections of the Paper

Foundations of a rewarding biology career! UA's Biology Department is diverse and vibrant. We have an array of biology courses that serve students seeking to go on to pre-professional schools (medicine, veterinary, dental and pharmacy), students interested in Zoology, Microbiology or Botany, students pursuing a master's in biology or going on to graduate schools, and current graduate ...

Department of Biology | Biology Department : The ...

The tree of life or universal tree of life is a metaphor, model and research tool used to explore the evolution of life and describe the relationships between organisms, both living and extinct, as described in a famous passage in Charles Darwin's *On the Origin of Species* (1859).. The affinities of all the beings of the same class have sometimes been represented by a great tree.
