Teach with Vernier—your committed lab partner for teaching biology with technology. Our complete solution of sensors, experiments, and resources is dedicated to your teaching success and your students' learning.

Biology | Vernier

pH is a measure of the acidity or basicity of a solution. It is defined as the cologarithm of the activity of dissolved hydrogen ions (H⁺). Hydrogen ion activity coefficients cannot be measured experimentally, so they are based on theoretical calculations. The pH scale is not an absolute scale; it is relative to a set of standard solutions whose pH is established by international agreement.

1. Introduction. Aquaculture has been on the frontline of public concerns regarding sustainability. Different issues are raised, such as the use of fish meal and oil as feed ingredients (Naylor et al., 2000), escapees of farmed fish from sea cages into the wild and the discharge of waste into the environment (Boyd et al., 2005, Buschmann et al., 2006).
