Publisher Summary. With the advent of powerful digital computers, determination of structure has become routine in modern research in synthetic chemistry. When the powdered crystalline solid diffracts monochromatic X-radiation, the diffraction pattern will be a series of concentric rings, rather than spots, because of the random orientation of the crystals in the sample.

APPENDIX 1 on SOLUBILITY and concentration calculations. How do you find out how soluble a substance is in water? Reminder: solute + solvent ==> solution i.e. the solute is what dissolves, the solvent is what dissolves it and the resulting homogeneous mixture is the solution.. The solubility of a substance is the maximum amount of it that will dissolve in a given volume of solvent e.g. water.

Calculating molarity units molar concentration of ...
