1 Computing with Language: Texts and Words. We're all very familiar with text, since we read and write it every day. Here we will treat text as raw data for the programs we write, programs that manipulate and analyze it in a variety of interesting ways. But before we can do this, we have to get started with the Python interpreter.

### **1. Language Processing and Python**

Googling old grammar books, it looks like this distinction was made in the mid-19th Century; the motivation seems to be that farther is the comparative of far, and further is the comparative of fore/forth. Indeed, further is etymologically the comparative of fore/forth, and it displaced farrer as the comparative of far some time during Middle English. But I'm not convinced there was any ...
