The increasing demand for food and the need to reduce the environmental impacts of agricultural production in the face of population growth make conservation practices a valuable alternative to increase the sustainability of agriculture. The adoption of these practices, important for food production in emerging economies, increases the feasibility of production on small and intermediate farms ...

"Life is good", the OECD said in its latest report on the Australian economy. While many countries are struggling with high unemployment and stagnant growth, Australia has not only pulled off 27 years of continuous growth but in the eyes of the Organisation for Economic Co-operation and Development, the labour market is resilient and there are "high levels of wellbeing, including health ...
