Tutorials & Exercises. Math Review. Exponents: These are simple exercises where numbers in Scientific Notation are multiplied or divided and you are required to enter the value of the exponent. Percentage Calculations: This is a simple exercise in calculating and manipulating percentages. Direct and Inverse Proportionality: This is a simple exercise in manipulating proportionalities.

Chemistry Online

A molecular formula is a representation of a molecule that uses chemical symbols to indicate the types of atoms followed by subscripts to show the number of atoms of each type in the molecule. (A subscript is used only when more than one atom of a given type is present.) Molecular formulas are also used as abbreviations for the names of compounds.

Algebra can essentially be considered as doing computations similar to those of arithmetic but with non-numerical mathematical objects. However, until the 19th century, algebra consisted essentially of the theory of equations. For example, the fundamental theorem of algebra belongs to the theory of equations and is not, nowadays, considered as belonging to algebra (in fact, every proof must use ...
