### **Answers To The Match Cell**

After running the first line of the following code, Excel changes the Match entire cell contents setting in the user interface. The result is that the next time the user presses Ctrl+F the search is done in the whole cell content. I don't like a VBA macro that changes a setting that affects the user experience, so I always execute the second line, which performs another search and sets the ...

If you'd like to isolate cells in a Microsoft Excel data sheet based on criteria that has a partial cell match, this can be done through the use of a MATCH function. When applied, the MATCH function searches for items in a range of cells based on any given criteria. When found, the function will direct you to any cells that fit the criteria given.
