Sampling and analysis or visual examination of soil to assess its status and use potential is widely practiced from plot to national scales. However, the choice of relevant soil attributes and interpretation of measurements are not straightforward, because of the complexity and site-specificity of soils, legacy effects of previous land use, and trade-offs between ecosystem services.

1. Adlerian Contribution to Contemporary Practice Question from Gil Levin (BOL): Alfred Adler's name is better known to today's therapists than are his ideas and methods. Your dedication to this body of work must be based on the belief that contemporary practice is diminished because Adler's contributions are not fully enough understood or used currently.
