This blog post resulted from an email exchange I had with Jill Downing, a Title 1 Educator with the Helena Public Schools in Montana. My recent blog about using the children's book 17 Kings and 42 Elephants included a link to an article I wrote, "Using Math Menus." Jill read the article and was interested in more information. Her questions pushed me to reflect on some of the nuts and bolts I ...

The big-fish-little-pond effect (BFLPE) is a frame of reference model introduced by Herbert W. Marsh and John W. Parker in 1984. According to the model, individuals compare their own self-concept with their peers and equally capable individuals have higher self-concepts when in a less capable group than in a more capable group. For example, it is better for academic self-concept to be a big ...

Men are better than women at math and science. This is a comment likely to rile the feathers of some of my more feminist readers, and yet I could easily support such a statement with evidence showing that men get higher SAT scores in math than women or how science and technology careers are predominantly male disciplines. In spite of this evidence, I wouldn't be the first to get into trouble ...
