Tycho Brahe (1580's) was astronomy's 1st true observer. He built the Danish Observatory (using sextant's since telescopes had not been invented yet) from which he measured positions of planets and stars to the highest degree of accuracy for that time period (1st modern database). He showed that the Sun was much farther than the Moon from the Earth, using simple trigonometry of the angle ...

Comet: Comet, a small body orbiting the Sun with a substantial fraction of its composition made up of volatile ices. Comets are among the most-spectacular objects in the sky, with their bright glowing comae and their long tails. Comets can appear at random from any direction as they move in eccentric orbits around the Sun.

comet | Definition, Composition, & Facts | Britannica.com

Indomania or Indophilia refer to the special interest India, Indians and Indian cultures have generated in the Western world, more specifically the culture and civilisation of the Indian subcontinent, especially in Germany. The initial British interest in governing their newly conquered territories awoke the interest in India, especially its culture and ancient history.

Indomania - Wikipedia
