Josh's comments are spot on. If you are not super familiar with critical values I'd suggest playing with qt, reading the manual (?qt) in conjunction with looking at a look up table (). When I first moved from SPSS to R I created a function that made critical t value look up pretty easy (I'd never use this now as it takes too much time and with the p values that are generally provided in the ...

Right. 42 is a literal constant.Constants are (or at least should be) immutable. That doesn't mean C ints in general are immutable.An int in C simply designates a place in memory. And the bits in that place is very much mutable. You can, for instance, create a reference of an int and change the referent of that reference. This change is visible in all references (including the original int ...
