5. Be aware of the free-response booklet instructions. It's helpful to know the actual AP Bio FRQ exam instructions: • Each answer should be written out in paragraph form; outline form is not acceptable. • Do not restate questions or provide more than the number of examples called for. • Diagrams alone will not receive credit, unless called for in the question.

In biology, regeneration is the process of renewal, restoration, and growth that makes genomes, cells, organisms, and ecosystems resilient to natural fluctuations or events that cause disturbance or damage. Every species is capable of regeneration, from bacteria to humans. Regeneration can either be complete where the new tissue is the same as the lost tissue, or incomplete where after the ...
