A force is a push or a pull that acts upon an object as a results of its interaction with another object. Forces result from interactions! As discussed in Lesson 2, some forces result from contact interactions (normal, frictional, tensional, and applied forces are examples of contact forces) and other forces are the result of action-at-a-distance interactions (gravitational, electrical, and ...

Summary. A TCP socket is an endpoint instance defined by an IP address and a port in the context of either a particular TCP connection or the listening state.. A port is a virtualisation identifier defining a service endpoint (as distinct from a service instance endpoint aka session identifier).. A TCP socket is not a connection, it is the endpoint of a specific connection.

networking - What is the difference between a port and a ...
