How Image Stacking Works. Image stacking is a popular method of image processing amongst astrophotographers, although the exact same technique can be applied to any situation where identical images can be captured over a period of time, in other words in situations where the scene isn't changing due to motion or varying light and shadow.

Background. The halting problem is a decision problem about properties of computer programs on a fixed Turing-complete model of computation, i.e., all programs that can be written in some given programming language that is general enough to be equivalent to a Turing machine. The problem is to determine, given a program and an input to the program, whether the program will eventually halt when ...
