## Think Python/Answers - Wikibooks, open books for an open world

Best Answer: I personally think Java is the best. Python, to me at least, is more like a functional programming language. It's easy to pick up and powerful in it's own way, but it can be quite frustrating to debug. C++ is a pretty low-level development language that is extremely powerful, but trades ...

### **Programming- Python, C++, or Java? | Yahoo Answers**

Definitely learn Python, its a powerful, but fairly easy language. As for any other ones, you may want to try Erlang (which can be used for Web Programming). This will introduce you to functional programming and this will give you a very different perspective from the C-based languages that you already know. Good luck!
