Master Chemistry, One Concept at a Time. Mastery Learning activities in OWLv2 enable students to work at their own pace until they understand each concept and skill. Instant feedback and richly dynamic problem sets encourage understanding over memorization.

OWLv2 - Cengage

Water has a very high specific heat capacity of 4.1814 J/(g·K) at 25 °C – the second highest among all the heteroatomic species (after ammonia), as well as a high heat of vaporization (40.65 kJ/mol or 2257 kJ/kg at the normal boiling point), both of which are a result of the extensive hydrogen bonding between its molecules. These two unusual properties allow water to moderate Earth's ...
