Genome editing, or genome engineering, is a type of genetic engineering in which DNA is inserted, deleted, modified or replaced in the genome of a living organism. Unlike early genetic engineering techniques that randomly inserts genetic material into a host genome, genome editing targets the insertions to site specific locations.. In 2018, the common methods for such editing use engineered ...

An Act of Toleration was passed, which put an end to religious persecution, and a Triennial Act was passed, which stated that Parliament had to meet every three years. William guided England into an aggressive foreign policy and greatly expanded the central government. Unlike rulers before him, William saw his limits.
