Can someone explain why answers for 5 and 6 are from a lesser concentration to a higher?? I thought because solutions seek to be isotonic, that solutions would disperse to move *from* a high concentration *to* a lower one (and therefore be balanced on both sides of the membrane, or generally be evenly dispersed if not across a membrane)

Evolution is change in the heritable characteristics of biological populations over successive generations. These characteristics are the expressions of genes that are passed on from parent to offspring during reproduction. Different characteristics tend to exist within any given population as a result of mutation, genetic recombination and other sources of genetic variation.

Answers in Genesis (AiG) is a fundamentalist Christian apologetics parachurch organization. It advocates Young Earth creationism on the basis of its literal, historical-grammatical interpretation of the Book of Genesis. Out of belief in biblical inerrancy, it rejects the results of those scientific investigations that contradict their view of the Genesis creation narrative and instead supports ...

1. Introduction. Biochar is the product of thermal degradation of organic materials in the absence of air (pyrolysis), and is distinguished from charcoal by its use as a soil amendment (Lehmann and Joseph, 2009). Biochar has been described as a possible means to improve soil fertility as well as other ecosystem services and sequester carbon (C) to mitigate climate change (Lehmann et al., 2006 ...

1. Adlerian Contribution to Contemporary Practice Question from Gil Levin (BOL): Alfred Adler's name is better known to today's therapists than are his ideas and methods. Your dedication to this body of work must be based on the belief that contemporary practice is diminished because Adler's contributions are not fully enough understood or used currently.
