SparkNotes: Evidence for Evolution: Biogeography

Q: What is Biogeography and why is it important to evolution? A: See Guns, Germs and Steel by Diamond (1998) Some continents (and countries - and islands) have different resources lying around - and thus different environments (and ecosystems) - t...

What is Biogeography and why is it important to evolution ...

Biogeography, the study of animal and plant distributions (and known individually as zoogeography and phytogeography, respectively), was a subject that began to receive much attention in the 19th century. One of the first modern delimitations of biogeographic regions was created in...

Biogeography | Britannica.com

Evolution on Islands: Studying island biogeography is important, but biogeography encompasses much more than Explore Evolution offers readers. What the book covers omits crucial information about the motion of the continents over time, falsely claims that island biogeography does not show novel features evolving on islands, and introduces ...

Biogeography - NCSE

Evolutionists claim that the biogeographic distribution of organisms provides strong evidence for evolution. Although studies of biogeography provide strong support for the process of speciation, they do not fit the wider predictions of evolutionary theory, and are inconsistent with the ancient earth geologists' model of slow continental drift.

Biogeography - creation.com

Biogeography is the study of the distribution of species and ecosystems in geographic space and through geological time. Organisms and biological communities often vary in a regular fashion along geographic gradients of latitude, elevation, isolation and habitat area. Phytogeography is the branch of biogeography that studies the distribution of plants. ...

Biogeography - Wikipedia

Biogeography and ecology were not always so clearly distinguished [2,3]; diverging scales of interest apparently contributed in part to their subsequent specialization, while rapid advances in technologies and exponential growth in scientific information enable re-annealing, much as in other

sciences .
