Rank the Moon, Sun and Earth in order from Greatest to Least. It's also in Science and I must know this question because I really badly want to Ace the test tomorrow. By the way first one to get the answer in correctly get a thumbs up and a chosen the best answer button?

Rank the Moon, Sun and Earth in order from Greatest to ...

Best Answer: You're correct - it's possible to treat the Earth - Moon system as orbiting a common centre of mass. This centre of mass is in an elliptical orbit around the Sun. The mass of the Earth is about 81 times that of the Moon and the Moon is 60 Earth radii away, so this centre of mass is within the Earth, but there is still a noticeable monthly "wobble" in the Earth's path around the Sun.

Seasons Earth Moon And Sun Gizmo Answer Key - The Earth ...

The position of the sun, earth and moon during a new moon phase is Sun, Moon then Earth. The moon is between the Earth and the sun causing the side of the moon facing the sun to block the sunlight from the other side of the moon (the side we see on Earth).

Answers for the Study Guide: Sun, and Moon Test

If connected by a line, the positions of Earth, the sun, and the moon should form a right triangle, with the sun at the vertex of the two longest sides. The moon will be at either side of Earth in the two positions. In both positions, a high tide is on the side of Earth facing the moon, and on the side facing away from the moon.
