I need to execute a command 100-200 times, and so far my research indicates that I would either have to copy/paste 100 copies of this command, OR use a for loop, but the for loop expects a list of items, hence I would need 200 files to operate on, or a list of 200 items, defeating the point.. I would rather not have to write a C program and go through the length of documenting why I had to ...

In addition to answering the W column questions, encourage students to write in the L column anything they found especially interesting. To distinguish between the answers to their questions and the ideas they found interesting, have students code the information in their L columns. For example, they can put a check mark next to the information that answers questions from the K column.
