No piece of equipment has as great an effect on the performance of a radio station, whether hand-held or home-based, as the antenna. Experimenting with antennas has been a favorite of hams from the very beginning, contributing greatly to the development of antennas for all radio services. To choose and use an antenna effectively, it's important to understand some basics of propagation ...

The mechanism of ionospheric propagation in supporting NLOS links is similar to that for atmospheric refraction but, in this case, the radio wave refraction occurs not in the atmosphere but in the ionosphere at much greater altitudes. Like its tropospheric counterpart, ionospheric propagation can sometimes be statistically modelled using Rayleigh fading.

Figure 1A - Franklin Array Stub [5] - Simple 1/4 wave stub My original version of Hiking 2m J-Pole uses a simple bent pipe phasing stub 1/2 wave in total length or about 1/4 wave "stub" length. Normal operation places equal and opposite currents on the top and bottom pieces reducing the effective radiation of the stub assembly.
