Golden rice is a variety of rice (*Oryza sativa*) produced through genetic engineering to biosynthesize beta-carotene, a precursor of vitamin A, in the edible parts of rice. It is intended to produce a fortified food to be grown and consumed in areas with a shortage of dietary vitamin A, a deficiency which each year is estimated to kill 670,000 children under the age of 5 and cause an additional ...

Inositol is a word that collectively refers to molecules with a similar structure, a collection of nine stereoisomers. While the term 'inositol' is used commonly with dietary supplements, it usually refers to a specific stereoisomer called myo-inositol. Inositols are pseudovitamin compounds that are falsely said to belong to the B-complex family, and are found in most foods but in highest ...
