One method is to use GO Term Mapper. Choose the aspect (Molecular Function, Biological Process, or Cellular Component) and indicate if you want to map to a generic slim or one curated for your organism (for example, the *S. cerevisiae* slim omits terms applicable only to plants or bacteria).. In order to map your annotations to a GO slim, use the Map2Slim option in OWLTools.

Femininity (also called girlishness or womanliness) is a set of attributes, behaviors, and roles generally associated with girls and women. Femininity is socially constructed, but made up of both socially-defined and biologically-created factors. This makes it distinct from the definition of the biological female sex, as both males and females can exhibit feminine traits.

Femininity - Wikipedia

The purpose of this page is to provide resources in the rapidly growing area of computer-based statistical data analysis. This site provides a web-enhanced course on various topics in statistical data analysis, including SPSS and SAS program listings and introductory routines. Background to the F-words: the International Classification of Functioning, Health and Disabilities (ICF) 2001. In 2001, the World Health Organization (2001) published a set of ideas about how we might think about health. These ideas, refining the WHO's original (World Health Organization 1980) International Classification of Impairment, Disability and Handicap (ICIDH), are meant to apply to ...
