Your KML file has over 3 million coordinates which is hitting some upper limit for a single KML file in Google Earth. You can scale to that number of contours/features and more if you break it up into smaller KML files, load them in a parent KML via NetworkLinks, and use Regions to only load those features that are in view.. Google Earth can scale up to millions of points and features but not ...

Is there any maximum size for KML files to open in Google ...

The chemistry of Earth's atmosphere during its first 2–2.5 Ga bears on several branches of geoscience including the origin of prebiotic molecules and life itself, early surface processes, the “faint young sun” problem, carbon isotope systematics, and the transition to an oxidized surface. The geologic record, as sparse as it is for this era, presents several difficulties for attempts to ...

Viewpoint: No, later scientists such as Nicolaus Copernicus and Galileo correctly realized that Earth moves around the Sun, not vice versa, and thus cannot be the center of the universe. It is easy in our human nature to believe that we are the center of the universe. A newborn infant must learn through experimentation and sensation that he is a part of the world, not the entirety.

OVERVIEW Close to the Edge means Coming Closer to Terms with God. On the fringe of our normal,

profane existence/consciousness, always present and ever near, is the real of the divine/sacred.

CLOSE TO THE EDGE - The Calling

A planet is an astronomical body orbiting a star or stellar remnant that is massive enough to be rounded by its own gravity, is not massive enough to cause thermonuclear fusion, and has cleared its neighbouring region of planetesimals.. The term planet is ancient, with ties to history, astrology, science, mythology, and religion.Five planets in the Solar System are visible to the naked eye.

Planet - Wikipedia

The loss of biodiversity is increasing. There is massive extinction from human activity. For example, fish stocks are dwindling, forest loss is resulting in the loss of many species, land and other resources are being misused, leading to various long terms costs.

The first question is easy to answer: Yes. Yes, hybrids are easier to hit than their corresponding long irons. (Remember: Long irons and hybrids cover the same yardages; that is, for the same golfer, a 3-iron and a 3-hybrid should be equivalent in the distance.

Hybrids vs. Irons: Are Hybrids Easier to Hit? Why?

The carrying capacity of a biological species in an environment is the maximum population size of the species that the environment can sustain indefinitely, given the food, habitat, water, and other necessities available in the environment. In population biology, carrying capacity is defined as the environment's maximal load, which is different from the concept of population equilibrium.
