The Purple Finch is the bird that Roger Tory Peterson famously described as a “sparrow dipped in raspberry juice.” For many of us, they’re irregular winter visitors to our feeders, although these chunky, big-beaked finches do breed in northern North America and the West Coast. Separating them from House Finches requires a careful look, but the reward is a delicately colored, cleaner ...

The largest living bird, a member of the Struthioniformes, is the ostrich (*Struthio camelus*), from the plains of Africa and Arabia. A large male ostrich can reach a height of 2.8 metres (9.2 feet) and weigh over 156 kilograms (344 pounds). A mass of 200 kg (440 lb) has been cited for the ostrich but no wild ostriches of this massive weight have been verified.

In some circles, however, opposition to the concept of evolution has persisted to the present. The argument from design has recently been revived by a number of academics with scientific credentials, who maintain that their version of the idea (unlike Paley's) is soundly supported by both microbiology and mathematics.

The history of ornithology largely reflects the trends in the history of biology, as well as many other scientific disciplines, including ecology, anatomy, physiology, paleontology, and more recently, molecular biology. Trends include the move from mere descriptions to the identification of patterns, thus towards elucidating the processes that produce these patterns.
