In monetary economics, the quantity theory of money (QTM) states that the general price level of goods and services is directly proportional to the amount of money in circulation, or money supply.. The theory was challenged by Keynesian economics, but updated and reinvigorated by the monetarist school of economics. While mainstream economists agree that the quantity theory holds true in the ...

It is hard to do better than Alex's video on Romer, pretty much definitive and Romer liked it too. Most importantly, Romer won the Prize for seeing how the non-rival nature of ideas can boost ongoing and indeed "endogenous" economic growth. Romer also showed mathematically that this process of growth is bounded, namely that it [...]
