Question 1141163: You want to estimate the mean time college students spend watching online videos each day. The estimate must be within 1 minute of the population mean, and you want to be 99% confident in your estimate. What sample size would be required if the standard deviation of viewing time is 2.4 minutes?

The addition rule helped us solve problems when we performed one task and wanted to know the probability of two things happening during that task. This lesson deals with the multiplication rule. The multiplication rule also deals with two events, but in these problems the events occur as a result of more than one task (rolling one die then another, drawing two cards, spinning a spinner twice ...

### **Standards of Learning Guided Practice Suggestions**

The mean is found by adding the 15 numbers together which gives 357. Now take 357 and divide it by 15. This gives the value for the mean to be 23. 8. To find the median, we have to make sure that the data set is in order. This data is already in order so we can proceed directly to finding the middle value. In a data set with 15 numbers, the median will be the 8th value.
