It's just a matter of defining your 'zero point'. In a real, actual gauge, pressure is measured relative to the atmospheric pressure. If there was 1 atmosphere of pressure inside a container (so it's the same pressure inside the container as it is outside it), the gauge will not read 1 atm, but rather 0 atm, as the pressure inside the container would just be the same as the pressure outside.

Science in a broad sense existed before the modern era and in many historical civilizations. Modern science is distinct in its approach and successful in its results, so it now defines what science is in the strictest sense of the term. Science in its original sense was a word for a type of knowledge, rather than a specialized word for the pursuit of such knowledge. In particular, it was the ...

It's quite common for a Hebrew term to carry more than one shade of meaning like this. Perhaps the nearest English word that might act as an umbrella term for both "faithfulness" and "truth" would be "dependableness," where faithfulness is dependableness of character in general, and truth is more specifically dependableness of word, speech, or information.
