Allergies, also known as allergic diseases, are a number of conditions caused by hypersensitivity of the immune system to typically harmless substances in the environment. These diseases include hay fever, food allergies, atopic dermatitis, allergic asthma, and anaphylaxis. Symptoms may include red eyes, an itchy rash, sneezing, a runny nose, shortness of breath, or swelling.

Allergy - Wikipedia

INTRODUCTION. Normal swallowing requires the coordinated action of muscles of the mouth, pharynx, larynx, and esophagus, which are innervated by the central and peripheral nervous systems().The swallowing process is generally divided into phases (oral, pharyngeal, and esophageal), which are modified during normal development due to anatomical and physiological maturation().

Screening tools for dysphagia: a systematic review - SciELO

Switching from intravenous (IV) to oral (PO) therapy as soon as patients are clinically stable can reduce the length of hospitalization and lower associated costs. While intravenous medications may be more bioavailable and have greater effects, some oral drugs produce serum levels comparable to those of the parenteral form.
